

# WHAT IF CLINICAL TRIALS STAFFED THEMSELVES?

MonitorForHire.com provides the only patented resource management tool for locating, assembling and contracting a workforce of independent clinical research monitors.

## THE PROCESS:

1. MonitorForHire.com captures key data on individual independent monitors, allowing companies to manage them as a pool of talent based on location, experience, certification and availability.
2. Then, we verify monitor backgrounds based on work history, education, and supervisor references.
3. Our service is designed to be as self-service or full-service as you desire, giving members optional access to in-house project assistants that facilitate the process and provide support by making selections and scheduling interviews.

## WHAT IT MEANS FOR YOU:

### CLOSE COLLABORATION CAN BE A GOOD THING

In both self serve and full service scenarios, our project personnel maintain contact with both the Client and Monitor for the duration of the project.

### WE WORK WELL TOGETHER

We have long standing relationships with many of our monitors so you can be assured your team will have not only the right skills, but also the right chemistry.

### WE'RE LEADERS IN OUR SPACE

With an unmatched and innovative approach to the clinical monitoring field, MonitorForHire.com is a proud pioneer of the industry. Visit our Twitter to see blog posts, white papers and insight on the latest developments in pharmaceutical trials.

## ABOUT MONITORFORHIRE.COM

- MonitorForHire.com has over 4,000 registered monitors in 60 countries, and nearly 900 sponsors.
